

Otto Hines

Chicago, Illinois | ohines@umich.edu | (708) 334-9041 | www.linkedin.com/in/otto-hines

EDUCATION

University of Michigan

Bachelor in General Studies (B.G.S.), Concentration: Computer Science and Information.

Ann Arbor, MI

June 2026

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Discrete Mathematics, SQL & Databases, Data Manipulation, Statistical Modeling in R, Social Science Data, Cognitive Science & Generative AI, Computer Organization

EXPERIENCE

Software Engineer

2023 – 2025

Cass & York

Remote (Detroit, MI)

- Built and shipped web apps and marketing sites using React, Next.js, and Remix for clients in logistics, automotive, and construction
- Developed full-stack features for a logistics platform (Livegestics), building out frontend interfaces and validating API and PostgreSQL database connections end to end
- Delivered a product landing page for Vintel, an automotive scanning company, using vanilla JavaScript, HTML, and CSS with sub-1s load times and 95+ Lighthouse scores
- Built a restaurant website for City Burger, implementing responsive layouts and content management workflows
- Refactored UI and data flows in response to evolving client requirements, keeping projects on schedule despite scope changes

Software Engineer Intern

Summer – 2022

Microsoft

Redmond, WA

- Engineered a cross-platform To-Do integration for Microsoft Teams and Dynamics 365 using React, TypeScript, and JavaScript, enabling seamless task sync across two enterprise products used by millions
- Designed a reusable React component library adopted across multiple Teams extensions, contributing to a shared design system
- Implemented full CRUD functionality via RESTful API integration with the Dynamics 365 backend, reducing manual workflow steps for internal productivity tools

IT Support Analyst

2016 – 2018

Equity Residential

Chicago, IL

- Provided real-time technical support to 200+ corporate employees across Windows 10 deployments, system reimaging, and hardware troubleshooting with same-day resolution
- Hardened enterprise security by implementing Symantec Encryption and managing network configurations for a 200+ person org

PROJECTS

Trading Dashboard

Next.js, React, TypeScript, Prisma, Supabase, Tailwind

- Built a full-stack trade journaling and analytics platform integrating TradeStation OAuth2 for live portfolio tracking, Finnhub API for real-time market data, and Recharts for interactive performance visualization

Mood

Next.js, TypeScript, Prisma, MySQL, Clerk

- Built a full-stack journaling platform with AI-powered sentiment analysis, Clerk authentication, protected route middleware, and a relational schema supporting automated mood scoring per entry

SKILLS

Languages: TypeScript, JavaScript, Python, Go, C++, SQL

Frontend: React, Next.js, Remix, Tailwind, HTML/CSS, Figma, Responsive Design, Accessibility (WCAG)

Backend: Node.js, Express, REST APIs, Prisma, Auth (OAuth 2.0, JWT, Clerk)

Database: PostgreSQL, MySQL, Supabase

Testing & CI/CD: Jest, React Testing Library, GitHub Actions

Cloud & Tools: AWS, Azure, Vercel, Docker, Git, Linux

AI-Assisted Development: Claude Code, GitHub Copilot, Cursor, LLM API integration (OpenAI/Anthropic)

Practices: Agile/Scrum, Code Review, Client Requirements Gathering

ACTIVITIES & LEADERSHIP

National Society of Black Engineers

2019-2020

Membership Chair

- Led a 30-person mentorship program, grew membership by 5%, and coordinated cross-functional events serving 150+ members
